Happy Mother's Day

It's time to cool off the temperature in the Greenhouse and let the plants get ready for outside planting. We suggest lowering the temperature by 1 degree every 4 days to allow the plants to harden off.

Mother's Day is this month and if you have some gift ideas you should show them off. Have some pictures displayed of various container combinations or have a display of herbs with recipes that include the herbs you offer.

Have lots of 4" and 6" pots that kids can buy for mum on her special day. Gerberas, Osteospermum, Begonias, and Geraniums are some of the varieties we recommend that make a beautiful gift for mum.
